

The PODAB Laundry Cart

Makes doing laundry so much easier!

Whether you use a front-loading, or a top-loading washing machine, moving your clean clothes from the washer, into the dryer, can sometimes be a hassle. Once the clothes are dry, carrying them around in a laundry basket can make doing laundry a real bother.

But not anymore! With the new **PODAB Laundry Cart**, doing laundry just got a whole lot easier! You just put the clean clothes into the cart, directly from the dryer. The laundry cart is at the right height and on wheels. Therefore you will not ruin your back by lifting or carrying anything around. PODAB has focused a lot around ergonomics in laundry rooms. With a **PODAB Laundry Cart**, you will also have more space left on shelves for ironed and folded clothes.

Patent
Pending

The **PODAB Laundry Cart** is of fine Scandinavian design. This is the very first time a laundry cart of this kind has been introduced for domestic use. The attention to detail, and the amazing design makes this cart very special. Once you experience the difference the **PODAB Laundry Cart** makes, you'll never do laundry without it!

- Four, high quality wheels allow the cart to roll smoothly, and quietly, across any floor surface, without damaging hard wood or tile flooring.
- Specially designed rubber bumpers that encase each of the wheel fittings make it nearly impossible to scratch your washing machine, or any wall surfaces in your home.
- The sturdy basket features an ergonomic design that allows the cart to easily slide under the door of a base-mounted, front-loading machine, or fit snugly next to a top loading machine, to ensure your clean laundry never falls to the floor.
- Thanks to the ingenious Scandinavian design, the PODAB Laundry Cart comes in a flat box and assembles in less than one minute – and the best part is, you don't even need any tools!

Instructions

Step 1: Remove cart from the flat packing box.

Step 2: Simply stand the cart up, and then expand it by pulling gently.

Step 3: Insert the base of the basket.

Step 4: Depress the locking button on the handle, and then slide the handle into the frame.

Step 5: Ready for use.
